## The Recycling Experts – Metro Recycling Solutions

Your State of Michigan Recycling Experts

The Recycling Experts network of professionals extends well beyond the 5 county Metro Detroit Area. In fact, we handle recyclables through-out all of the cities in Michigan. If your in Western Michigan or even located in the Upper Peninsula, we have special programs for you. We have learned that companies in remote areas are not quite up to the levels of recycling education as those in "big cities". What do we do? We bring the Big City knowledge to you. Essentially, we establish recycling programs just like those in Detroit or Grand Rapids. We train your employees with the same information and handle shipping as if you were in a major metropolitan area.

For those of you in medium size cities such as Lansing, Flint, Jackson, or Kalamazoo, we have a number of associated recyclers who can work together to aid you in the handling of your recyclables.

We even have a recycling plant in the Battle Creek area and Detroit so our range of collection of material is virtually unlimited in Michigan. Are you in Michigan? Then we are the Experts that can handle your recycling needs! Call a Recycling Expert today. We can help you.
