### The Recycling Experts - Non Profit Recycling Programs

Professionals for Non-profit groups, Cities, Municipalities, Schools

The Recycling Experts have a Recycling Professional who has, for over 10 years, worked hand in hand with non-profit and governmental agencies in the development of Recycling Programs. Currently, we handle over 20 governmental/municipal recycling programs. Our executive can help with comprehensive audits, staff training, equipment needs and volume monitoring services. These programs are tailored for reporting to City Auditors and Board Members. We provide exceptional solutions to your waste reduction needs. In addition, these programs work to develop awareness of environmental issues and landfill avoidance. We operate in small communities, major cities, and even rural countryside's.

Schools and non-profit groups are similar in their training needs. With schools, we develop programs to teach teachers and students the benefits of recycling. We recently enacted a very unique program with the City of Detroit and the City of Flint School Districts. All the schools in each district participated and the teachers were extremely impressed with the involvement of the students. In addition, we rewarded the student with the most interest a special prize.

The Boys Scouts of America, The Girl Scouts of America, as well as many churches partner with us to providing recycling awareness and arranging fundraising opportunities and continue successful facility recycling programs. Vocational services and employment opportunities to people with barriers is also part of our training that we provide.

Needless to say, collection programs are specifically designed to meet your individual needs.

Contact us to investigate what we can do for you.
